Subject: Addendum # 2 to IFB #24-013 – **Hauling and Disposal Services**

The purpose of this addendum is to clarify an answer to Addendum No. 1, Question and Answer #5 about the IFB. Additions are in **red text**.

I. Questions. Fairfax Water official responses are provided in *Italics*:

#	QUESTION	ANSWER
5)	<p>Since the fill is clean, I wanted to know if the fill can be taken outside of Virginia? In Maryland for example the Montgomery County MD transfer station accepts fill by the ton, and is permitted by the EPA to receive waste. Essentially are we able to dispose of the material outside of the State as long as the site is permitted as a landfill by the State, and the EPA to accept the waste? Or is the material forced to stay within Virginia for some reason?</p>	<p><i>This material shall be hauled to a permitted Virginia Department of Environmental Quality (VADEQ) Construction and Demolition Debris (CDD) Landfill Disposal site.</i></p> <p><i>Please note that IFB 24-013 Hauling and Removal of Excavated Debris Services requires disposal of solid waste that is produced or generated during construction, remodeling, or repair of asphalt pavements and other structures. The Code of Virginia defines solid waste that is produced or generated during construction, remodeling, or repair of asphalt pavements, and other structures as construction waste (reference 9VAC20-81-10. Definitions.). The Code of Virginia further regulates construction/demolition/debris (CDD) landfills. CDD landfills may only receive demolition waste, construction waste, debris waste, land-clearing debris, split tires, and white goods. Therefore, IFB 24-013 requires this material shall be hauled to a permitted Virginia Department of Environmental Quality (VADEQ) CDD Landfill Disposal site.</i></p>
